

Janusz Matkowski

## List of publications

1. *On some properties of solutions of a functional equations*, Prace Nauk. Uniw. Śląsk. Katowice, Prace Mat. **1**(1969), 79-82.
2. *On meromorphic solutions of a functional equations*, Ann. Polon. Math. **22**(1970), 303-311.
3. *On the continuous dependence of solutions of a functional equation on given functions*, Ann. Polon. Math. **23**(1970), 37-40.
4. *On the continuous dependence of local analytic solutions of a functional equation on given functions*, Ann. Polon. Math. **24**(1970), 21-26.
5. *On the uniqueness of differentiable solutions of a functional equation*, Bull. Polish Acad. Sci. Math. **18**(1970), 253-255.
6. *Note on a functional equation*, Zeszyty Nauk. Uniw. Jagiellon., Prace Mat. **14**(1971), 109-111.
7. *On meromorphic solutions of a functional equation II*, Ann. Polon. Math. **24**(1971), 313-318.
8. *On the continuous dependence of  $C^r$  solutions of a functional equation on given functions*, Aequationes Math. **6**(1971), 215-227.
9. *On the continuous dependence of local analytic solutions of a functional equation in a non-uniqueness case*, Ann. Polon. Math. **24**(1971), 319-326.
10. *On the existence of differentiable solutions of a functional equation*, Bull. Polish Acad. Sci. Math. **19**(1971), 19-21.
11. (with M. Kuczma) *Solutions of a functional equation in a special class of functions*, Ann. Polon. Math. **26**(1972), 289-293.
12. *The uniqueness of solutions of a system of functional equations in some special classes of functions*, Aequationes Math. **8**(1972), 233-237.
13. (with K. Baron) *On the solutions fulfilling a Lipschitz condition of a nonlinear functional equation*, Rev. Roumaine Math. Pures Appl. **17**(1972), 1149-1154.
14. *On Lipschitzian solutions of a functional equation*, Ann. Polon. Math. **28**(1973), 135-139.
15. *Some inequalities and generalization of Banach's principle*, Bull. Polish Acad. Sci. Math. **21**(1973), 323-324.
16. (with K. Baron) *A fixed point theorem for nonexpansive mappings on compact metric spaces*, Publ. Inst. Math. (Beograd), **15**(1973), 25-26.
17. (with Z. Kominek) *On the existence of a convex solution of a functional equation*, Ann. Polon. Math. **30**(1974), 1-4.
18. (with M. C. Zdun) *Solutions of bounded variation of a linear functional equation*, Aequationes Math. **10**(1974), 223-237.
19. *Integrable solutions of functional equations*, Dissertationes Math. **127**(1975), 1-68.
20. (with K. Baron and R. Ger) *Analytic solutions of a system of functional equations*, Publ. Math. Debrecen **22**(1975), 189-194.

21. (with K. Baron) *On sequences of contraction mappings*, Rev. Roumaine Math. Pures Appl. **22**(1977), 189-194.
22. *Fixed point theorems for mappings with a contractive iterate at a point*, Proc. Amer. Math. Soc. **62**(1977), 344-348.
23. *Integrable solutions of a linear functional inequality*, in General Inequalities I, (edited by E.F. Beckenbach), Birkäuser Verlag, Basel (1978), 213-215.
24. (with Roman Węgrzyk) *On equivalence of some fixed point theorems for selfmappings of metrically convex space*, Boll. Un. Math. Ital. A(**15**)(1978), 359-369.
25. *Fixed point theorems for contractive mappings in metric space*, Czechoslovak Math. J. **105**(1980), 341-344.
26. (with W. Ogińska), *Note on iterations of some entire functions*, Ann. Uniw. Mariae Curie-Skłodowska, Sect. A, **33**(1979), 111-118.
27. (with Z. Benedykt) *Remarks on a fixed point theorem*, Demonstratio Math. **14**(1981), 227-232.
28. *Functional equation and Nemytskii operators*, Funcial. Ekvac. **25**(1982), 127-132.
29. *Form of Lipschitz operators of substitution in Banach space of differentiable functions*, Zeszyty Nauk. Politech. Łódz. Mat. **17**(1984), 5-10.
30. (with J. Miś) *On a characterization of Lipschitzian operators of substitution in the space  $BV[a, b]$* , Math. Nachr. **117**(1984), 155-159.
31. *Cauchy functional equation on restricted domain and commuting functions*, in Iteration Theory and its Functional Equations, Proc., Schloss Hofen 1984, Springer Verlag **1163**(1985), 101-106.
32. *Remark on  $BV$ -solutions of a functional equation connected with invariant measures*, Aequationes Math. **29**(1985), 210-213.
33. (with J. Miś) *Examples and remarks to a fixed point theorem*, Facta Univ. Ser. Math. Inform. (Nis), **1**(1986), 53-56.
34. (with M. Sablik) *Some remarks on a problem of C. Alsina*, Stochastica (Barcelona) **10**(1986), 199-212.
35. (with Z. Kominek) *On a functional equation  $\varphi(x) = \alpha\varphi(\alpha x) + (1 - \alpha)\varphi(1 - (1 - \alpha)x)$* , Bull. Math. Soc. Sci. Math. Roumaine **30**(1986), 327-334.
36. (with Cz. Dyjak)  *$BV$ -solutions of nonlinear functional equations*, Glasnik Mat. **22**(1987), 335-342.
37. *On Nemytskii Lipschitzian operator*, Acta Univ. Carolin. - Math. Phys. **28**(1987), 79-85.
38. *On Nemytskii operator*, Math. Japon. **33**(1988), 81-85.
39. (with K. Lichawski and J. Miś) *Locally defined operators in the space of differentiable functions*, Bull. Polish Acad. Sci. Math. **37**(1989), 315-325.
40. *On a characterization of  $L^p$ -norm*, Ann. Polon. Math. **50**(1989), 137-144.
41. *The converse of the Minkowski's inequality theorem and its generalization*, Proc. Amer. Math. Soc. **109**(1990), 663-675.
42. *A functional inequality characterizing convex functions, conjugacy and a generalization of Hölder's and Minkowski's inequalities*, Aequationes Math. **40**(1990), 169-180.

43. (with T. Świątkowski) *Quasi-monotonicity, subadditive bijections of  $R$  and characterization of  $L^p$ -norm*, J. Math. Anal. Appl. **154**(1991), 493-506.
44. *A generalization of Hölder's and Minkowski's inequality and conjugate functions*, Constantin Caratheodory: An International Tribute, edited by Th. M. Rassias, 1991 World Scientific Publ. Co., 819-827.
45. *On an iteration group and its application to a proof of the converse of Minkowski's inequality theorem*, Proc. European Conference on Iteration Theory, Batschuns, Austria, September 10-16, 1989, World Scientific (1991), 215-223.
46. *On  $\alpha$ -Wright convexity and the converse of Minkowski's inequality*, Aequationes Math. **43**(1992), 106-112.
47. *Functional inequality characterizing concave functions in  $(0, \infty)^k$* , Aequationes Math. **43**(1992), 219-224.
48. (with P. Kahlig) *On some aspects of interpolation and functional equation*, in Selected Topics in Functional Equations and Iteration Theory, Proceedings of the Austrian-Polish Seminar, Universität Graz, October 24-26, 1991, edited by D. Gronau and L. Reich, Grazer Math. Ber. **316**(1992), 93-98.
49.  *$L^p$ -like paranorms*, in Selected Topics in Functional Equations and Iteration Theory, Proceedings of the Austrian-Polish Seminar, Universität Graz, October 24-26, 1991, edited by D. Gronau and L. Reich, Grazer Math. Ber. **316**(1992), 103-139.
50. (with N. Merentes) *Characterization of globally Lipschitzian composition operators in the Banach space  $BV_p^2$* , Arch. Math. (Brno), **28**(1992), 181-186.
51. *Subadditive functions and a relaxation of the homogeneity condition of seminorms*, Proc. Amer. Math. Soc. **117**(1993), 991-1001.
52. *On a generalization of Mulholland's inequality*, Abh. Math. Sem. Hamburg, **63**(1993), 97-103.
53. (with K. Nikodem) *Solutions of some functional inequalities connected with convex functions*, C. R. Math. Rep. Acad. Sci. Canada **15**(1993), 114-118.
54. (with T. Świątkowski) *Subadditive functions and partial converses of Minkowski's and Mulholland's inequalities*, Fundamenta Mathematicae **143**(1993), 75-85.
55. *On a characterization of  $L^p$ -norm with the aid of the triangle inequality*, Zeszyty Nauk. Politech. Łódz. Mat. **23**(1993), 77-91.
56. (with N. Merentes) *Characterization of globally Lipschitzian composition operator in the Sobolev space  $W_p^n[a, b]$* , Zeszyty Nauk. Politech. Łódz. Mat. **24**(1993), 91-99.
57. *Functions which are additive on their graphs and some generalizations*, Roczniki Naukowo-Dydaktyczne WSP Kraków, Prace Mat. **13**, Zeszyt 159(1993), 233-240.
58. *On a generalization of Browder-Goehde-Kirk fixed point theorem*, Zeszyty Nauk. Politech. Łódz. Mat. **25**(1993), 71-76.
59. (with T. Świątkowski) *On subadditive functions*, Proc. Amer. Math. Soc. **119**(1993), 187-197.
60. (with J. Rätz) *On the equality condition in Hölder's and Minkowski's inequalities*, Aequationes Math. **46**(1993), 220-227.

61. (with D. Gronau) *Geometrical convexity and generalization of the Bohr-Mollerup theorem on the Gamma function*, Math. Pannonica **4/2**(1993), 153-160.
62. *The converse of the Hölder inequality and its generalizations*, Studia Math. **109**(2) (1994), 171-182.
63. (with K. Baron and K. Nikodem) *A sandwich with convexity*, Math. Pannonica **5/1**(1994), 139-144.
64. *Nonlinear contractions in metrically convex space*, Publ. Math. Debrecen **45**(1994), 103-114.
65. (with D. Gronau) *Geometrically convex solutions of certain difference equation and generalized Bohr-Mollerup type theorems*, Results in Math. **26**(1994), 290-297.
66. (with K. Nikodem) *An integral Jensen inequality for convex multifunctions*, Results in Math. **26**(1994), 348-353.
67. (with P. Kahlig) *On some extensions of the Gotqb-Schinzel functional equation*, Ann. Math. Siles. **8**(1994), 13-31.
68. (with M. Pycia) *Convex-like inequality, homogeneity, subadditivity, and a characterization of  $L^p$ -norm*, Ann. Polon. Math. **60**(1995), 221-230.
69. (with M. Pycia) *On  $(\alpha, a)$ -convex functions*, Arch. Math. (Basel) **64**(1995), 132-138.
70. (with A. Matkowska and N. Merentes) *Remark on globally Lipschitzian composition operators*, Demonstratio Math. **28**(1995), 171-175.
71. *Remarks on multiplication of subadditive functions*, Zeszyty Nauk. Politech. Łódz., Mat. **27**(1995), 139-145.
72. (with Z. Kominek) *On stability of the homogeneity condition*, Results in Math. **27**(1995), 373-380.
73. *On a system of simultaneous iterative functional equations*, Ann. Math. Siles. **9**(1995), 123-135.
74. (with J. Jelínek) *Remark on Generalization of Minkowski's inequality*, Acta Univ. Carolinae - Math. Phys. **36**(1995), 27-32.
75. (with J. Jachymski and T. Świątkowski) *Nonlinear contractions on semi-metric spaces*, J. Appl. Anal. **1**(1995), 125-134.
76. (with P. Kahlig) *Functional equations involving logarithmic mean*, Z. Agnew. Math. Mech. **78**(1996), 385-390.
77. (with M. Pycia) *Positive homogeneous functionals related to  $L^p$ -norms*, J. Math. Anal. Appl. **200**(1996), 245-253.
78. (with M. Wróbel) *A generalized  $\alpha$ -Wright convexity and related functional equation*, Ann. Math. Siles. **10**(1996), 7-12.
79. *On a characterization of  $L^p$ -norm and a converse of Minkowski's inequality*, Hiroshima Math. J. **26**(1996), 277-287.
80. (with P. Kahlig) *Envelopes of special class of one-parameter families of curves*, Demonstratio Math. **29**(1996), 799-806.
81. (with P. Kahlig and A. Matkowska) *On a class of composite functional equations in a single variable*, Aequationes Math. **52**(1996), 260-283.
82. (with S.L. Singh) *Banach type fixed point theorem on product of spaces*, Indian J. Math. **38**(1996), (published in 1997), 73-80.

83. (with J. Rätz) *Equality in Minkowski inequality and a characterization of  $L^p$ -norm*, Demonstratio Math. **30**(1997), 53-62.
84. *The converse of a generalized Hölder inequality*, Publicationes Math. Debrecen **50**(1997), 135-143.
85. (with J. Rätz) *Convexity of power functions with respect to symmetric homogeneous means*, Internat. Ser. Num. Math. **123**(1997), 231-247.
86. (with J. Rätz) *Convex functions with respect to an arbitrary mean*, Internat. Ser. Num. Math. **123**(1997), 249-259.
87. *Lipschitzian composition operators in some Banach function spaces*, Nonlinear Analysis, Pergamon Press, (1997), 719-726.
88. (with P. Kahlig) *On the composition of homogeneous quasiarithmetic means*, J. Math. Anal. Appl. **216**(1997), 69-85.
89. (with W. Zhang) *Method of characteristic for functional equations in polynomial form*, Acta Math. Sinica, New Series, **13**(1997), 421-432.
90. (with P. Kahlig) *Envelopes of families of curves related to some iterative functional equations*, Grazer Math. Ber. **334**(1997), 163-171.
91. *Iteration groups with generalized convex and concave elements*, Grazer Math. Ber. **334**(1997), 199-216.
92. (S. L. Singh) *Round off stability of functional iterations on product spaces*, Indian J. Math. **39**(1997), 275-286.
93. (with W. Zhang) *Characteristic analysis for a polynomial-like iterative equation*, Chinese Sci. Bull. **43**(1998), 192-196.
94. (with Z. Zgraja) *A separation theorem for  $M^\varphi$ -convex functions*, Math. Pannonica, **9**(1998), 103-109.
95. *Continuous solutions of a functional equation*, Publicationes Math. Debrecen, **52**(1998), 559-562.
96. (with K. Nikodem) *Convex set-valued functions and their conjugate*, Rocznik Nauk.-Dydaktyczny WSP Kraków, Prace Mat. **15**(1998), 103-107.
97. (with P. Kahlig) *Decomposition of homogeneous means and construction of some metric spaces*, Math. Ineq. Appl. **1**(1998), 463-480.
98. (with J. Rätz) *A characterization of  $L^p$ -norm with the aid of equality condition in the Hölder inequality*, Demonstratio Math. **32**(1999), 165-170.
99. *Invariant and complementary means*, Aequationes Math. **57**(1999), 87-107.
100. *Mean value property and associated functional equation*, Aequationes Math. **58**(1999), 46-59.
101. (with P. Kahlig) *On a functional equation for Dido's problem*, Ann. Math. Siles. **13**(1999), 167-180.
102. *Iterations of mean-type mappings and invariant means*, Ann. Math. Siles. **13**(1999), 211-226.
103. (with W. Zhang) *On linear dependence of iterates*, J. Appl. Anal. **6**(2000), 149-157.
104. (with W. Jarczyk) *Remarks on quasi-arithmetic means*, Rocznik Naukowo-Dydaktyczny Akademii Pedagogicznej w Krakowie, Prace Matematyczne **17**(2000), 125-141.

105. (with P. Kahlig and A.N. Sharkovsky) *Dido's functional equation revisited*, Rocznik Naukowo- Dydaktyczny Akademii Pedagogicznej w Krakowie, Prace Matematyczne **17**(2000), 143-150.
106. (with W. Zhang) *On the polynomial-like iterative functional equation*, Functional Equations and Inequalities edited by Th. M. Rassias, in Mathematics and Its Applications **518**, Kluwer Academic Publishers, Dordrecht-Boston-London, 2000, 145-170.
107. (with M. Sablik) *On a problem of Alsina again*, J. Math. Anal. Appl. **254**(2001), 627-635.
108. *On iteration semigroups of mean-type mappings and invariant means*, Aequationes Math. **64**(2002), 297-303.
109. *Funkcyjne równania*, Wielka Ecyklopedia PWN, vol. **9**(2002), 446-447.
110. *Średnie i związane z nimi ciągi*, Delta **3(334)** (2002), 4-5.
111. (with W. Ślepak) *On  $(\alpha$ -a)-convex set valued functions*, Far East J. Math. Sci. (FJMS) **4**(1)(2002),85-89.
112. (with M. Wróbel) *Representation theorem for locally defined operators in the space of Whitney differentiable functions*, Proc. Of the 3rd Polish Symposium on Nonlinear Analysis, Lecture Notes in Nonlinear Analysis **3**, 2002, 131-139.
113. *J. Ciąg geometryczny - metoda rozwiązywania równań rekurencyjnych*, Delta **7(334)** (2002), 12-13.
114. *On invariant generalized Beckenbach-Gini means*, in Functional Equations - Results and Advances, ed. by Z. Daróczy and Zs. Páles, Kluwer Academic Press, Boston/Dordrecht/London, 2002, 219-230.
115. (with W. Jarczyk) *On Mulholland's inequality*, Proc. Amer. Math. Soc. **130**(2002), 3243-3247.
- 116 (with D. Głazowska i W. Jarczyk) *Arithmetic mean as a linear combination of two quasi-arithmetic means*, Publ. Math. Debrecen **61**(2002), 455-467.
117. (with J. Błasińska, D. Głazowska) *An invariance of the geometric mean with respect to Stolarsky mean-type mapping*, Result. Math. **43**(2003), 42-55.
118. (with G. Guzik, W. Jarczyk) *Cocycles of continuous iteration semigroups*. Bull. Polish Acad. Sci. Math. vol **51**(2)(2003), 185-197.
119. *Affine and convex functions with respect to the logarithmic mean*, Colloq. Math. **95**(2003), 217-230.
120. (with P. Kahlig) *Solution of Z. Daróczy problem on mixing quasi-arithmetic means*, Acta Sci. Math. (Szeged) **69**(2003), 49-56.
121. (with D. Gronau) *Another characterization of the Gamma function*, Publ. Math. Debrecen **63**(2003), 105-113.
122. (with J. Okrzesik) *On a composite functional equation*, Demonstratio Math. **36**(2003), 653-658.
123. *On subadditive functions and  $\psi$ -additive mappings*, CEJM **4** (2003), 435-440.
124. (with D. Krassowska) *A pair of linear functional inequalities of iterative type related to a Cauchy functional equation*, Chapter 6 in Functional Equations, Inequalities and Applications, ed.by Th.M. Rassias, Kluwer Academic Publishers, Dordrecht/ Boston/ London, 2003, 73-89.

125. (with P. Kahlig) *A modified Gotqb-Schinzel functional equation (with applications to meteorology and fluid mechanics)*, Sitzungsber. Österr. Akad. Wiss., Math.-naturwiss. Abt. II (2002), Österr. Akad. Wiss. 2003, 117-136.
126. *Remarks on some problems of Th. M. Rassias*, Aequationes Math. **67**(2004), 197-200.
127. *Solution of regularity problem in equality of Cauchy means*, Publ. Math. Debrecen **63** (2004), 391-400.
128. *The converse theorem for Minkowski's inequality*, Indag. Mathem., N.S. **15**(1)(2004), 73-84.
129. *Convex functions with respect to a mean and a characterization a quasi-arithmetic mean*, Real Anal. Exchange **29** (1), 2003/2004, 220-246.
130. (with P. Kahlig) *The Gotqb-Schinzel functional equation restricted to half-lines*, Sitzungsber. Österr. Akad. Wiss., Math.-naturwiss. Abt. II (2003), Österr. Akad. Wiss. 2004, (212): 57-67.
131. (with P. Kahlig) *Elliptic means and their generalizations*, Anzeiger Abt. II(2003), Österr. Akad. Wiss. 2004, (139): 7-15.
132. (with D. Krassowska) *A pair of linear functional inequalities and a characterization of  $L^p$ -norm*, Ann. Polon. Math. **85**(1)(2005), 1-11.
133. *Lagrangean mean-type mapping for which the arithmetic mean is invariant*, J. Math. Anal. Appl. **309**(2005), 15-24.
134. (with P. Kahlig) *Distributions of homogeneous means of uniform independent random variables and a characterization of means*, Aequationes Math. **70**(2005), 254-267.
135. (with J. Jarczyk) *Invariance in the class of weighted quasi-arithmetic means*, Ann. Polon. Math. **88**(2006), 39-51.
136. (with J. Domsta), *Invariance of the arithmetic mean with respect to special mean-type mappings*, Aequationes Math. **71**(2006), 70-85.
137. *On weighted extensions of Cauchy's means*, J. Math. Anal. Appl. **319**(2006), 215-227.
138. *O średnich w trapezie*, Delta **7(386)** (2006), 6-7.
139. *On iterations of means and functional equations*, Iteration Theory. (ECIT'04), Grazer Math. Ber. **350**(2006), 184-197.
140. (with D. Głazowska), *An invariance of the geometric mean with respect to Lagrangean means*, J. Math. Anal. Appl. **331**(2007), 1187-1199.
141. *When  $M$ -convexity of a function implies its  $N$ -convexity for some means  $M$  and  $N$* , Inter. Math. Forum Vol 2, no. **45-49** (2007), 2321-2331.
142. *Remarks on Lipschitzian mappings and some fixed point theorems*, Banach J. Math. Anal. **2**(2007), 237-244 (electronic), [www.math-analysis.org](http://www.math-analysis.org).
143. (with D. Krassowska) *A simultaneous system of functional inequalities and mappings which are weakly of a constant sign*, J. Inequal. Pure and App. Math. **8**(2)(2007), Art 35, 9p.
144. (with M. Wróbel) *Locally defined operators in the space of Whitney differentiable functions*, Nonlinear Analysis **68**(2008), 2933-2942.
145. (with D. Krassowska, T. Małolepszy) *A pair of linear functional inequalities characterizing polynomials*, Aequationes Math. **75** (2008), 276-288.

146. (with P. Volkman) *A functional equation with two unknown functions*, <http://www.mathematik.uni-karlsruhe.de/~semlv>, Seminar LV, No 30 (2008), 6pp. (28.04.08.)
147. *Uniformly continuous superposition operators in the spaces of differentiable functions and absolutely continuous functions*, Internat. Ser. Numer. Math. **157** (2008), 155-166.
148. *Converse theorem for the Minkowski inequality*, J. Math. Anal. Appl. **348** (2008), 315-323.
149. *Generalized convex functions and a solution of a problem of Zs. Páles*, Publ. Math. Debrecen, **73**/3-4 (2008), 421-460.
150. (with Emilio Porcu and Jorge Mateu) *Quasi Arithmetic Covariance Functions and their Possible Reducibility through Functional Equations*, Chapter 6 in Emilio Porcu and Jorge Mateu, *Positive Definite Functions: From Schoenberg to Space-Time Challenges*, Department of Mathematics, University of Jaume I (2008), p. 155-176.
151. *Iteration groups, commuting functions and simultaneous systems of linear functional equations*, Opuscula Math. (4) **28** (2008), 531-541.
152. *A converse of the Hölder inequality theorem*, MIA (1)**12**(2009), 21-32.
153. (with M. Wróbel) *Representation theorem for locally defined operators in the space of Whitney differentiable functions*, Manuscripta Mathematica, **129** (4) (2009), 437-448.
154. *Uniformly continuous superposition operators in the space of Hölder functions*, J. Math. Anal. Appl. **359** (2009), 56-61.
155. *On extension of solutions of a simultaneous systems if iterative functional equations*, Opuscula Math. (4) **29**, 2009, 415-421.
156. *Extension of solutions of a functional equation in two variables*, Opuscula Math. (4) **29**, 2009, 415-421.
